MODIFICATION #19 TO AGREEMENT #3491 PROFESSIONAL SERVICES AGREEMENT TILLAMOOK COUNTY AND DON G. AVERILL RECYCLING, INC. TRANSFER STATION OPERATION, TRANSPORT AND DISPOSAL FOR PROCESSING OF SOLID WASTE

This Agreement Modification, hereafter "Modification #19", is entered into by and between DON G. AVERILL RECYCLING, INC., hereafter "Contractor" and Tillamook County, hereafter "County", pursuant to ORS 203.010. The parties entered into a Professional Services Agreement on December 3, 2003. The parties intend this Modification to modify their earlier Agreement only as to their expressions herein. The mutual promises of each are given in exchange and as consideration for, the promises of the other.

ANNUAL WASTE FEE ADJUSTMENT

Tillamook County hereby offers Change Order #18 19 to execute the annual Waste Fee Adjustment of 77/100 Dellars (\$0.77) Four and 95/100 Dellars (\$4.95) per ton to the current contract per ton rate of Sixty-Seven and 81/100 Dellars (\$67.81) Sixty-Eight and 58/100 Dellars (\$68.58) being paid to Don G. Averill Recycling, Inc. The Sixty-Eight and 58/100 Dellars (\$68.58) Seventy-Three and 53/100 Dellars (\$73.53) per ton will be effective starting July 1, 2021 2022 and will continue through June 30, 2021 2023.

The specific language/detail of this "Waste Fee Adjustment" to the Contract can be found in the RFP, Section 6.5 (b).

The Contract start date for the Tillamook Transfer Station was January, 2004. The Waste Fee Adjustment is to be executed after the initial year of the contract for a start date of July 1, 2005. Each year thereafter the Waste Fee Adjustment is calculated to become effective on July 1st. The Waste Fee Adjustment amount uses the Consumer Price Index (CPI) – All Urban Consumers West Region to determine an annual adjustment to the price per ton rate. The January Report (published in February) is used to determine the annual adjustment. Don Averill Recycling, Inc. proposed an 80% adjustment of the Consumer Index.

The parties agree to use the Annual Average CPI-U for the West Region in further adjustments.

Beginning July 1, 2016, the supplemental cost increase of 58/100 Dollars (\$0.58) per ton as a result of the increase in the Oregon Department of Environmental Quality's Permit Compliance and Tipping Fees was approved by the Board of County Commissioners, sitting as the Board of the Solid Waste Service District. This is included in the calculation accordingly.

Beginning July 1, 2018, changes in PUC fees resulted in an additional 25/100 Dollars (\$0.25) per ton, included in the calculation accordingly.

MODIFICATION #19 TO AGREEMENT #3491 PROFESSIONAL SERVICES AGREEMENT TILLAMOOK COUNTY AND DON G. AVERILL RECYCLING, INC. TRANSFER STATION OPERATION, TRANSPORT AND DISPOSAL FOR PROCESSING OF SOLID WASTE

Each year Contractor shall obtain an annual performance bond in the amount of One Hundred Thousand and 00/100 Dollars (\$100,000.00) and naming Tillamook County as the Obligee.

All provisions of the underlying Agreement not otherwise modified by this document remain in full force and effect and are incorporated herein by reference.

- 4. CONTRACT DOCUMENTS: The following documents comprise the contract and are incorporated here by reference in their entirety.
 - 4.1. "Tillamook County Solid Waste Service District Request for Proposals Transfer Station Operation, Transport and Disposal for Processing of Solid Waste" dated August 18, 2003;
 - 4.2. Don G. Averill Recycling, Incorporated, 1500 N. Main Avenue, Tillamook, OR 97141" Proposal, dated October 2, 2003;

Consumer Price Index, West Region — January 2022 Area prices were up 0.9 percent over the past month, up 7.7 percent from a year ago

Prices in the West Region, as measured by the Consumer Price Index for All Urban Consumers (CPI-U), advanced 0.9 percent in January, the U.S. Bureau of Labor Statistics reported today. (See table A.) The January increase was influenced by higher prices for shelter. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect seasonal influences.)

Over the last 12 months, the CPI-U rose 7.7 percent. (See chart 1 and table A.) This was the largest over-the-year increase in the CPI-U for the West Region since June 1982. Food prices rose 7.4 percent. Energy prices jumped 30.3 percent, largely the result of an increase in the price of gasoline. The index for all items less food and energy rose 6.2 percent over the year. (See table 1.)

Food

Food prices advanced 1.0 percent for the month of January. (See table 1.) Prices for food at home increased 0.9 percent, influenced by higher prices for fruits and vegetables (1.8 percent). Prices for food away from home advanced 1.0 percent for the same period.

Over the year, food prices rose 7.4 percent. Prices for food at home increased 8.2 percent since a year ago largely due to an increase for meats, poultry, fish, and eggs (13.1 percent). Prices for food away from home increased 6.3 percent.

Energy

The energy index advanced 1.6 percent over the month. The increase was mainly due to higher prices for electricity (3.2 percent). Prices for natural gas service advanced 6.1 percent, but prices for gasoline inched down 0.1 percent for the same period.

Energy prices jumped 30.3 percent over the year, largely due to higher prices for gasoline (42.3 percent). Prices paid for natural gas service increased 25.4 percent, and prices for electricity increased 12.6 percent during the past year.

All items less food and energy

The index for all items less food and energy rose 0.8 percent in January. Higher prices for new and used motor vehicles (1.6 percent), medical care (1.4 percent), and shelter (0.5 percent) were partially offset by lower prices for other goods and services (-0.3 percent).

Over the year, the index for all items less food and energy rose 6.2 percent. Components contributing to the increase included new and used motor vehicles (21.5 percent), household furnishings and operations (8.4 percent), and shelter (4.8 percent).

The February 2022 Consumer Price Index for the West Region is scheduled to be released on March 10, 2022.

Technical Note

The Consumer Price Index (CPI) is a measures of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 93 percent of the total U.S. population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 29 percent of the total U.S. population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 75 urban areas across the country from about 6,000 housing units and approximately 22,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date; for most of the CPI-U the reference base is 1982-84 equals 100. An increase of 7 percent from the reference base, for example, is shown as 107.000. Alternatively, that relationship can also be expressed as the price of a base period market basket of goods and services rising from \$100 to \$107. For further details see the CPI home page on the Internet at www.bls.gov/cpi and the CPI section of the BLS Handbook of Methods available on the internet at www.bls.gov/opub/hom/cpi/.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. **NOTE: Area indexes do not measure differences in the level of prices between cities; they only measure the average change in prices for each area since the base period.**

The West Region covered in this release is comprised of the following thirteen states: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
